Allowable Subject Matter

Claims 7, 9-17, 23 and 26 allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record and that encountered while searching for the claimed invention fails to anticipate and/or suggest: In a data processing system, a method comprising the steps of: wherein the step of requesting a migratable storage key will identify a parent key in the migratable storage tree, and wherein the step of requesting a non migratable storage key will identify a parent key in the non migratable storage tree that corresponds to the parent key in the migratable storage tree as recited in claim 7.

The prior art of record and that encountered while searching for the claimed invention fails to anticipate and/or suggest: in a data processing system, a method comprising the steps of wherein the second command requests creating a non-migratable storage key with the given authentication data and a second parent key which is determined from looking up a key that corresponds to the first parent key in a database as recited in claim 9.

migratable storage keys corresponding to a subset of the migratable storage keys in the migratable storage tree as recited in claim 23.

The prior art of record and that encountered while searching for the claimed invention fails to anticipate and/or suggest: in a data processing system, a method comprising wherein the use authorization in the non-migratable storage tree is obtained by hashing the concatenation of the user authorization in the migratable storage tree with a fixed string as recited in claim 26.

Regarding claims 10-17, these claims depend from claim 9 and are therefore allowable.
